**Subject:** RE: DRAFT Aug 31 meeting

Jerriann:

I have no comments on the meeting notes and believe that the proposed additional survey is appropriate to supplement earlier inventory efforts. The combine coverage is sufficient to evaluate the potential impact from underground mining operations on cultural resources located or predicted to be in the area of potential subsidence. The collective inventories, eligibility consultations, effect evaluations, and mitigation/data recovery efforts if necessary, coupled with the MOA and PA, should be sufficient for UDOGM to make their necessary cultural permit findings and for OSM to make its recommendation on the mining plan. Like Matt I am curious about the "5 landform" reference

Foster

Subject: DRAFT Aug 31 meeting

Here is my best attempt at the DRAFT meeting notes. Please review and provide comments as soon as possible. Once I receive all comments I will finalize and sent to file.

Foster, I will call you on Tues.

Thank you for all your time and input!!
